healthy farms, healthy food, healthy land.

Organic Land Care Providers in New Jersey

What is good for your food is good for your home landscape as well! NOFA Organic Land Care, run by NOFA-CT and NOFA-MA accredits lawn care providers who have completed a five-day course, passed an exam and met continuing education requirements. In addition to these providers, noted as accredited in their listings, there are many more land care providers who provide organic services.

Organic lawn and land care is not regulated under the USDA organic regulations; consumers should carefully question potential service providers about their lawn care practices and philosophy. *This listing is a service provided by NOFA-NJ and is not an endorsement of any individual or company listed below*
